### ■ THE YOUNG GODS

'XX Years 1985-2005'

(Pias recordings)

The cult Swiss band have always been ahead of their time, taking music to another level of innovation and experimentation. Their unique, imaginative use of samples and drums have created an exciting, new "rock" sound. Franz Treichler's instantly recognizable voice sings disorientating, yet oddly poetic lyrics. Opening with new track "Secret", this CD compilation of work from over 20 years together is packed-full of classics - from 'Envoyé' to 'Skinflowers' or 'Kissing The Sun'. Absolutely essential listening.
