THE YOUNG GODS

'XXY'

(Pias)

Twenty year best of from the
godfathers of industrial rock.

★★★★★

Swiss avante garde electronic rockers Young Gods have been blasting their unique sampled rock for two decades now and have influenced a wide range of bands from Nine Inch Nails through to The Prodigy. This compilation documents their illustrious career and includes their finest moments. Their biggest hit 'Skinflowers' is probably the most well-known amongst the nineteen tracks here. Other gems include the thrashy 'Envoye' and the tripped out 'Our House'. More recent tracks like 'Lucidogen' are an awesome experience if listened to on headphones as they completely engulf the listener in a swirling torrent of sound. An awesome, genre-defying band. Here's to another twenty years!
